

Date	Specialty	Age	Gender	Do you have a private infirmary?	Do you work in a hospital/private clinic?	As health professional, do you currently have access to the patient records kept in electronic format (e.g., electronic health record)?	Do patients have access to their own electronic health records?	How often you are requested by patients to assist them in accessing their health data?	In your practice / organization / country, how would you rate the level of digital skills of nurses?	How do you envision the future role of doctors in guiding their patients in managing their health data?
4/25/2022 21:59:35	PNEUMONOLOGIST	35-45	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	
4/25/2022 21:59:44	Rheumatologist	35-45	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	
4/25/2022 22:01:27	PNEUMONOLOGIST	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	This is an important role, provided there is electronic guidance and computerisation
4/25/2022 22:01:46	PSYCHIATRIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't see it
4/25/2022 22:02:07	BIOPATHOLOGIST	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	For the better I hope
4/25/2022 22:02:18	PNEUMONOLOGIST	45-55	FEMALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Positive in this direction
4/25/2022 22:02:39	OTORINOLARGOLOGIST	55-65	MALE	YES	YES	Yes, but I can only see patient health data	Yes, they can see their records and can transfer their data to other healthcare providers	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	Everyone is familiar with technology and this helps medical services.
4/25/2022 22:02:46	PATHOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I don't care.
4/25/2022 22:03:11	GYNAECOLOGIST - OBSTETRICIAN	45-55	MALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is crucial
4/25/2022 22:03:21	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	It is not in the doctor's role to instruct the patient to get access to his data, this should be the job of another organisation. However, the existence of such a program is necessary and will solve many problems arising from the lack of knowledge of the patient's history.
4/25/2022 22:03:28	NEUROLOGIST	55-65	MALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Promising
4/25/2022 22:04:06	OPHTHALMOLOGIST	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	It is not the doctor's job. The patient finds and trusts his doctor and together he sees his health data.
4/25/2022 22:04:14	PSYCHIATRIST	35-45	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	co-operating with us
4/25/2022 22:04:30	GYNAECOLOGIST - OBSTETRICIAN	25-35	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Moderate role, each citizen will have access with special platforms
4/25/2022 22:04:44	Oncologist	55-65	MALE	YES	YES	Yes, but I can only see patient health data	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	it is important
4/25/2022 22:04:53	ENDOCRINOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	I haven't thought about it.
4/25/2022 22:05:21	OTORINOLARGOLOGIST	25-35	MALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It should not be the doctor's responsibility, but a secretarial support. The doctor should only take care of adding information to the folder.
4/25/2022 22:06:09	WITHOUT SPECIALTY	45-55	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	Difficult to realise
4/25/2022 22:06:45	SURGEON	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's hard
4/25/2022 22:06:46	UROLOGIST	35-45	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is likely to fall under the duties of a family doctor first and foremost.
4/25/2022 22:07:01	SURGEON	45-55	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	When companies prepare a product they have to ask professionals if it is functional and what to record.

4/25/2022 22:07:05	CARDIOLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Very important given that we are experiencing a dramatic change in health and technology simple and continues guidance with constant information. This, however, requires a relatively simple and easy process of electronic access (as from the outset the possibility of electronic access which older ages probably do not have!)
4/25/2022 22:07:10	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	
4/25/2022 22:07:11	ORTHOPAEDIC	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Less important
4/25/2022 22:07:48	PATHOLOGIST	55-65	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Guidance and scheduling.
4/25/2022 22:07:50	PLASTIC SURGEON	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Based on current and possible future data, I consider it necessary to guide patients by doctors in order to be able to manage their health data.
4/25/2022 22:08:08	PATHOLOGIST	35-45	MALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	More Simplified Applications
4/25/2022 22:08:10	CARDIOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	It is necessary
4/25/2022 22:08:48	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	It would be helpful for the health system and hospitals to have an electronic database. In this way, not only the doctor, but the patient himself has access to his health data. Our role as physicians will be guiding and counseling, demonstrating to patients how to access and manage information in the target group that can respond to such a change. Training should be done either individually to the family doctor or to groups of young patients.
4/25/2022 22:08:53	PATHOLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	VERY DEMANDING
4/25/2022 22:09:02	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	It would be helpful for the health system and hospitals to have an electronic database. In this way, not only the doctor, but the patient himself has access to his health data. Our role as physicians will be guiding and counseling, demonstrating to patients how to access and manage information in the target group that can respond to such a change. Training should be done either individually to the family doctor or to groups of young patients.
4/25/2022 22:09:12	WITHOUT SPECIALTY	25-35	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is very important that the doctor informs and guides the patient with regard to the data in the electronic file in order to achieve a faster and personalised service in both primary health and private clinics.
4/25/2022 22:09:32	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	IT IS NECESSARY TO IMPROVE THE DIGITAL CAPABILITIES OF DOCTORS, BUT THIS REQUIRES A GREAT IMPROVEMENT OF THE DIGITAL CAPABILITIES OF THE POPULATION, A LARGE PERCENTAGE OF WHICH ARE LITERALLY DIGITALLY ILLITERATE!
4/25/2022 22:10:14	GENERAL/FAMILY MEDICAL DOCTOR	45-55	FEMALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	The problem is the lack of time to do it.
4/25/2022 22:10:37	ORTHOPAEDIC	45-55	MALE	YES	YES	Yes, but I can only see patient health data	Yes, they can see their records and can transfer their data to other healthcare providers	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Personally, I haven't thought about it yet; I always see it when it happens as an additional responsibility that does not belong to a doctor's responsibilities.
4/25/2022 22:10:40	CYTOLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I believe that every patient has the right to be able to manage their health data.
4/25/2022 22:10:45	OPHTHALMOLOGIST	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	As in the United States with a 10-year delay
4/25/2022 22:11:03	PATHOLOGIST	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is critical
4/25/2022 22:11:08	GASTROENTEROLOGIST	55-65	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I don't envision it.
4/25/2022 22:11:10	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	With interest, however, it requires patience and training.

4/25/2022 22:12:04	GYNAECOLOGIST - OBSTETRICIAN	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	Patients should have immediate access to their health data, and so should doctors with permission from their patients. The doctor must protect patients' health data and help them to be informed and able to access their health data.
4/25/2022 22:12:06	Rheumatologist	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Important but not maisonette
4/25/2022 22:12:13	PAEDIATRICIAN	65-75	MALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Difficult
4/25/2022 22:12:32	RADIOLOGIST	35-45	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	In the alternative, perhaps, since this is not their main role.
4/25/2022 22:13:31	PNEUMONOLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	It's not about me.
4/25/2022 22:13:32	UROLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	With digital technology it will be easy to communicate physicians-patients
4/25/2022 22:13:40	PAEDIATRICIAN	45-55	FEMALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	The doctor needs time and help to compile the electronic records while informing and guiding his patients about them. At present, electronic systems are slow, they are stuck, and especially in public structures, the doctor is forced to do anything other than medicine. It definitely needs modernisation.
4/25/2022 22:13:49	ANESTHESIOLOGIST	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It should, logically, become more meaningful.
4/25/2022 22:14:21	ORTHOAEDIC	55-65	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Once trained, they will be able to guide patients in managing their health data.
4/25/2022 22:14:29	ENDOCRINOLOGIST	45-55	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	I wouldn't want it to be one of the responsibilities of doctors!
4/25/2022 22:15:21	PATHOLOGIST	35-45	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's hard
4/25/2022 22:15:24	ORTHOAEDIC	45-55	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Primary
4/25/2022 22:16:34	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Be able to solve their questions about the issue.
4/25/2022 22:17:03	GYNAECOLOGIST - OBSTETRICIAN	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Patients must have an updated health card with them as they have a credit card.
4/25/2022 22:17:05	HAEMATOLOGIST	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Avoid bureaucracy
4/25/2022 22:17:21	OTHER SPECIALTY	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Very difficult
4/25/2022 22:17:27	RADIOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Easy and standard
4/25/2022 22:17:38	ENDOCRINOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't visualise
4/25/2022 22:17:43	CARDIOLOGIST	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It's an additional task for doctors this whole process. Guidance should be provided to patients from some other bodies, perhaps, so that the doctor is more concerned with his essential role, which is the patient and less with these "bureaucratic" issues.
4/25/2022 22:18:22	Oncologist	45-55	MALE	NO	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Data management should not be part of the medical practice.
4/25/2022 22:19:00	DERMATOLOGIST-APHRODISIOLOGIST	65-75	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I believe that doctors should be able to guide their patients in managing their health data under the following two conditions: 1. Improve their own digital skills and 2. To organise by the state centrally the coveted "electronic patient file".
4/25/2022 22:19:01	ENDOCRINOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	
4/25/2022 22:19:33	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	Cooperation between medical practitioners and patients for the use and exploitation of electronic health file data
4/25/2022 22:19:36	PATHOLOGIST	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Always have access from the doctor's file or from an electronic file of clinic hospital or therapist

4/25/2022 22:19:55	PATHOLOGIST	35-45	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	A personal doctor for every patient has to be for free.
4/25/2022 22:20:41	DERMATOLOGIST-APHRODISILOGIST	55-65	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	it is important
4/25/2022 22:20:52	PAEDIATRICIAN	45-55	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	IT IS IMPORTANT
4/25/2022 22:21:06	PSYCHIATRIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It is important
4/25/2022 22:21:14	ENDOCRINOLOGIST	65-75	MALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Relatively difficult, but not impossible. We need the training of all those involved.
4/25/2022 22:21:40	PNEUMONOLOGIST	65-75	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It's good.
4/25/2022 22:22:23	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	There should be better new and more user-friendly programs for the management of medical records, and clearly there should be easy guidance on how these programs work.
4/25/2022 22:22:47	PAEDIATRICIAN	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	As long as the examination is based on the payment, there will be no time to update.
4/25/2022 22:23:43	PATHOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Active
4/25/2022 22:24:25	CARDIOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is important
4/25/2022 22:24:52	Rheumatologist	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Through interactive ways between private hospitals and patients and in particular through an app to inform and explain patients' medical issues
4/25/2022 22:25:46	DERMATOLOGIST-APHRODISILOGIST	35-45	FEMALE	NO	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I agree, it must be done immediately.
4/25/2022 22:26:03	UROLOGIST	55-65	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	That's not the doctor's job.
4/25/2022 22:26:21	PSYCHIATRIST	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Give them instructions in person and via internet links
4/25/2022 22:26:46	PATHOLOGIST	45-55	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's a good idea.
4/25/2022 22:27:22	ENDOCRINOLOGIST	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Unification of services is needed
4/25/2022 22:28:22	PSYCHIATRIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	It is important
4/25/2022 22:28:25	GYNAECOLOGIST - OBSTETRICIAN	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I hope
4/25/2022 22:29:44	PATHOLOGIST	35-45	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Doctors should be able to access an easy-to-use electronic health record of patients so that they can also guide their patients in using it. At the moment there is no such thing in Greece. The existing electronic health record is extremely difficult to use.
4/25/2022 22:29:51	GENERAL/FAMILY MEDICAL DOCTOR	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Away from their role
4/25/2022 22:30:00	UROLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	This is not the case.
4/25/2022 22:30:59	WITHOUT SPECIALTY	25-35	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	healthcare professionals should help and encourage their patients to register their health data and protect and inform them in case of use of this data by third parties such as insurance companies, pharmaceuticals, etc.

4/25/2022 22:31:12	CARDIOLOGIST	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is an important innovation but as a doctor in a cutting-edge hospital, I do not wish to be entrusted with another role within my already extremely suffocating daily duty. Perhaps family doctors/primary care practitioners are better suited to this role.
4/25/2022 22:31:37	Rheumatologist	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	
4/25/2022 22:31:52	CARDIOLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I agree with the possibility
4/25/2022 22:32:37	GENERAL/FAMILY MEDICAL DOCTOR	35-45	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's hopeful.
4/25/2022 22:33:00	GENERAL/FAMILY MEDICAL DOCTOR	45-55	FEMALE	NO	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It requires better organised health data to enable the patient to manage their health data.
4/25/2022 22:34:00	CARDIOLOGIST	55-65	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It's very good.
4/25/2022 22:34:10	CARDIOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I can't imagine how this interaction would take place.
4/25/2022 22:34:43	PATHOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	I'M NOT WATCHING
4/25/2022 22:36:53	ORTHOPAEDIC	55-65	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Doctors should become an indispensable cricket in the chain of patient health data management
4/25/2022 22:37:08	PNEUMONOLOGIST	35-45	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Supportive
4/25/2022 22:37:30	GASTROENTEROLOGIST	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	I'm not watching
4/25/2022 22:37:41	PATHOLOGIST	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Necessary
4/25/2022 22:37:44	ORTHOPAEDIC	55-65	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	FEW WILL USE THEM.
4/25/2022 22:38:04	UROLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Not at all
4/25/2022 22:39:15	ENDOCRINOLOGIST	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	IT'S A GOOD IDEA.
4/25/2022 22:40:15	SURGEON	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	When at the country were i am practicing it will be mandatory at the private clinics as it is at the university hospitals
4/25/2022 22:41:02	OTTORINOLARGOLOGIST	35-45	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	It's hard for you.
4/25/2022 22:41:18	ORTHOPAEDIC	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It's hard
4/25/2022 22:41:50	PAEDIATRICIAN	55-65	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Doctors need to be properly informed.
4/25/2022 22:41:56	ENDOCRINOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	It is likely to burden the doctor with additional procedures.
4/25/2022 22:42:07	PSYCHIATRIST	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	More practical
4/25/2022 22:42:12	PATHOLOGIST	35-45	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Accommodating and assisting
4/25/2022 22:43:27	GENERAL/FAMILY MEDICAL DOCTOR	25-35	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	At the moment, things are very fluid.
4/25/2022 22:43:40	Pediatric psychiatrist	55-65	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Facilitation — awareness-raising

4/25/2022 22:44:03	ENDOCRINOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	The primary role of a doctor is to correctly diagnose and administer effective treatment without side effects. By obtaining a correct history through the personal contact of a patient doctor, everything of interest from a medical point of view is revealed. All the rest are secondary. However, there is access to prescriptions of medicines by other doctors with the consent of the patient.
4/25/2022 22:44:07	CARDIOLOGIST	35-45	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is important
4/25/2022 22:44:23	PATHOLOGIST	45-55	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Very important
4/25/2022 22:47:15	SURGEON	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	I have no opinion they don't have the level to manage.
4/25/2022 22:52:41	ORTHOPAEDIC	55-65	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	VERY IMPORTANT
4/25/2022 22:52:46	NEUROLOGIST	45-55	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Patients of all ages should gain greater capacity to manage electronic data and, of course, much more familiar with the use of computers. From that point on, the doctor could inform patients both in reading and updating their records.
4/25/2022 22:53:01	OTORINOLARGOLOGIST	55-65	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Have access to their health data whenever they want to
4/25/2022 22:53:39	GYNAECOLOGIST - OBSTETRICIAN	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	It's an important parameter, but it's not the main role of the doctor.
4/25/2022 22:53:57	OPHTHALMOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	IT'S A GOOD IDEA.
4/25/2022 22:54:11	CARDIOLOGIST	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Be able to be informed about their electronic file online and be guided by their doctor at the level of prevention
4/25/2022 22:55:14	GYNAECOLOGIST - OBSTETRICIAN	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I don't see it
4/25/2022 22:55:37	PAEDIATRICIAN	55-65	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	THEY MUST OBTAIN ANALOGOUS KNOWLEDGE AND PROPER AWARENESS OF THE CRITERIA FOR SUCH GUIDANCE.
4/25/2022 22:57:05	PATHOLOGIST	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	The family doctor should keep and be responsible for informing the patient's medical file, while the references to and information from specialist doctors will be made. The patient must have access to his electronic file at any time. There should be a high level of assurance of the personal data of the patient. The electronic file is intended only for the facilitation and improvement of medical surveillance and not for punitive measures of insurance character (e.g. mandatory preventive measures, insurance penalties, etc.)
4/25/2022 22:57:17	NEUROSURGEON	45-55	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Digital education of citizens is an obligation of the state, not of doctors, nor can it be a medical duty. Finally let us distinguish what is medical work, secretarial support and what each of us should know about their rights and how to access the data concerning them.
4/25/2022 22:57:18	PATHOLOGIST	55-65	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It's hard because of a lack of time.
4/25/2022 22:57:19	GYNAECOLOGIST - OBSTETRICIAN	35-45	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	We are very far from this!The doctors themselves are busy and it is not easy to deal with it too!And they do not have the necessary knowledge for this!
4/25/2022 22:58:21	HAEMATOLOGIST	65-75	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Depending on the training of doctors and patients
4/25/2022 22:58:58	RADIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	It is problematic

4/25/2022 22:59:07	HAEMATOLOGIST	65-75	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Responsible information with international and Greek data
4/25/2022 23:00:48	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	First and foremost
4/25/2022 23:01:05	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	Positive
4/25/2022 23:03:11	NEPHROLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is important
4/25/2022 23:03:30	PATHOLOGIST	35-45	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	With freedom and open mind
4/25/2022 23:04:09	GENERAL/FAMILY MEDICAL DOCTOR	25-35	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Like in the Scandinavian countries. They have access with their individual number to an application/platform and fully recall what has ever been prescribed, examinations, Examinations, opinions, etc.
4/25/2022 23:06:36	PAEDIATRICIAN	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	
4/25/2022 23:06:52	NEUROLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	
4/25/2022 23:07:28	OPHTHALMOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	Cooperation with patients
4/25/2022 23:07:42	GASTROENTEROLOGIST	35-45	MALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	I think that all doctors should regularly go through well-structured training — familiarisation seminars with digital capabilities in order to be able to properly direct their patients to these technologies.
4/25/2022 23:08:57	PATHOLOGIST	35-45	FEMALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	The guidance is important
4/25/2022 23:09:39	GENERAL/FAMILY MEDICAL DOCTOR	55-65	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	As a central role of a single system where both the doctor and the patient will have direct access
4/25/2022 23:09:58	DERMATOLOGIST-APHRODISIOLOGIST	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It's hard for you.
4/25/2022 23:10:11	PSYCHIATRIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	More helpful and effective
4/25/2022 23:11:17	DERMATOLOGIST-APHRODISIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	
4/25/2022 23:11:39	PNEUMONOLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	The electronic file and the interconnection of hospital clinics and examinations via the official health code are necessary
4/25/2022 23:12:17	PAEDIATRICIAN	45-55	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Important and substantial
4/25/2022 23:12:35	BIOPATHOLOGIST	35-45	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Stop clawback so there's money for other things.
4/25/2022 23:15:12	OPHTHALMOLOGIST	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	1. Patients should always have a copy of the opinion at the end of the examination. 2. Train them to check who had access to their medical records. And this is the best security system. (if the files are required to keep a log file.
4/25/2022 23:15:42	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	The family doctor could be the primary doctor who will train and encourage patients to manage their electronic files, without of course excluding doctors from other specialists.
4/25/2022 23:16:17	PAEDIATRICIAN	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	Advisory
4/25/2022 23:17:50	PSYCHIATRIST	35-45	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Additional workload

4/25/2022 23:18:00	Oncologist	55-65	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I am concerned by the excessive focus on the digitalisation of health services because it leads to rupture of human-centric medicine!
4/25/2022 23:20:56	PAEDIATRICIAN	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Crucial
4/25/2022 23:21:08	PATHOLOGIST	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	The role of the doctor is essential
4/25/2022 23:25:02	CARDIOLOGIST	55-65	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	It's not the doctor's job.
4/25/2022 23:25:52	SURGEON	45-55	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Medical doctors' obligation is to provide thorough explanation regarding patient's medical condition. The ministry of health in collaboration with all the involved parties has to provide the tools
4/25/2022 23:25:56	ORTHOPAEDIC	45-55	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	The doctor should be able to choose which personal health data of the patient can be accessible to the patient and not only to other healthcare professionals who will need to manage or access their file because the cognitive level of many patients as opposed to their access to the internet is often incomplete and can lead to misunderstandings, reactions or legal disputes. Patients of an appropriate educational level or ability to understand should be able to further access all information
4/25/2022 23:27:41	Vascular Surgeon	35-45	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	The role of the doctor is advisory to the patient. Patients themselves need to be trained in accessing and using their digital health data.
4/25/2022 23:28:27	ORTHOPAEDIC	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It is not mandatory
4/25/2022 23:30:26	PATHOLOGIST	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Moderate
4/25/2022 23:30:34	PAEDIATRICIAN	55-65	FEMALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is important
4/25/2022 23:30:35	ANESTHESIOLOGIST	45-55	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	A strictly defined legal framework for the management of health data by those directly concerned is needed and only through this will the doctor be able to reliably assist his/her patients.
4/25/2022 23:30:52	BIOPATHOLOGIST	35-45	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	
4/25/2022 23:31:34	THORACIC SURGEON	35-45	MALE	NO	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Doctors should specifically inform patients about their rights
4/25/2022 23:34:35	HAEMATOLOGIST	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Any role we play in guiding patients in managing their health data should be assigned after adequate education, information-information and financial support-benefits.
4/25/2022 23:36:36	PATHOLOGIST	35-45	FEMALE	NO	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I believe that it is the responsibility of other bodies to inform about management. The doctor can answer any questions as long as he has been informed.
4/25/2022 23:39:23	PAEDIATRICIAN	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It's a big deal.
4/25/2022 23:42:09	ORTHOPAEDIC	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	The doctor should be the only one who comes in to inform the patient about it. The patient should have access to the file without being able to modify it. It is necessary to develop a single patient management programme for all physicians, so that there is only one medical file accessible to all doctors, accessible by electronic signature.
4/25/2022 23:42:35	CARDIOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	MORE ACTIVE

4/25/2022 23:43:25	WITHOUT SPECIALTY	35-45	FEMALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	more cooperative and regular
4/25/2022 23:45:09	NEPHROLOGIST	35-45	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	
4/25/2022 23:45:23	PSYCHIATRIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I don't visualise
4/25/2022 23:45:33	ORTHOPAEDIC	45-55	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	.
4/25/2022 23:49:02	GYNAECOLOGIST - OBSTETRICIAN	35-45	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	There should be proper guidance first of the doctors and then the patients.
4/25/2022 23:49:15	CARDIOLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I expect this role to be shifted to pharmacists.
4/25/2022 23:50:22	OTTORINOLARGOLOG OLOGIST	35-45	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	With the realisation at last of the role of family doctor, as is done in the United Kingdom. This will be one of their duties.
4/25/2022 23:51:50	PNEUMONOLOGIST	35-45	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	The doctor should have a central role in data management.
4/25/2022 23:59:08	ORTHOPAEDIC	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Doctors will be reasonably the trainers of their patients, in terms of the digital management and distribution both within Greece and transnationally, of their health data.
4/25/2022 23:59:44	PATHOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Important
4/26/2022 0:00:05	PNEUMONOLOGIST	45-55	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Consultative,explanatory,functional
4/26/2022 0:01:47	SURGEON	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	With no reason
4/26/2022 0:01:47	SURGEON	35-45	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	
4/26/2022 0:06:31	SURGEON	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It is not feasible, it might be dangerous. A high level of understanding of data from the sidelines is required
4/26/2022 0:07:28	PATHOLOGIST	55-65	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	The national health management system should be accessible to all and to inform private doctors equal to doctors in public structures.
4/26/2022 0:08:44	OTHER SPECIALTY	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	HAVE A FILE OF PATIENTS AND THEIR NURSING
4/26/2022 0:09:03	Nuclear Medicine Phys	55-65	MALE	NO	YES	No, I have no access to electronic health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	DOCTORS WILL PLAY A CRUCIAL ROLE AND IT IS ESPECIALLY IMPORTANT THAT PATIENTS MANAGE THEIR MEDICAL FILES.
4/26/2022 0:09:40	RADIOLOGIST	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Public hospitals must first acquire equipment and know-how to create an electronic file and after the doctor has learned to use the file, in turn he will inform the patient.
4/26/2022 0:10:26	WITHOUT SPECIALTY	25-35	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Detailed information for each patient, in simple terms
4/26/2022 0:10:46	DERMATOLOGIST-APHRODISILOGIST	55-65	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It is important
4/26/2022 0:12:06	PATHOLOGIST	35-45	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	Doctors should work top of their license. This is work for nurses/administrative staff/physician assistants.
4/26/2022 0:12:53	PATHOLOGIST	55-65	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is their right to have full access to their individual file. If I can, I'll help them.
4/26/2022 0:14:13	Rheumatologist	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	It is important
4/26/2022 0:16:38	OTTORINOLARGOLOG OLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	The building block

4/26/2022 0:16:49	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	THEY SHOULD PROGRESSIVELY GUIDE THEM.
4/26/2022 0:20:02	NEUROSURGEON	35-45	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	There should be a constant link between a doctor and a patient so that the doctor can provide personalised advice and health care.
4/26/2022 0:20:07	CARDIOLOGIST	55-65	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	Perhaps unquoted
4/26/2022 0:20:54	OTTORINOLARGOLOG OLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I haven't thought about it.
4/26/2022 0:24:31	Pediatric psychiatrist	55-65	FEMALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Be able to guide practically and ethically, e.g. where and how information will be used.
4/26/2022 0:26:19	UROLOGIST	45-55	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Supportive
4/26/2022 0:27:03	PATHOLOGIST	45-55	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is important
4/26/2022 0:28:24	UROLOGIST	45-55	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	Common medical record for all and all health facilities
4/26/2022 0:28:47	GENERAL/FAMILY MEDICAL DOCTOR	35-45	FEMALE	NO	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	creation of an electronic health file and access to patient-authorized health data — restriction of immaterial prescribing, carried out in special cases
4/26/2022 0:29:24	ENDOCRINOLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	IT IS IMPORTANT
4/26/2022 0:34:45	GYNAECOLOGIST - OBSTETRICIAN	35-45	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	Patients should have access to their medical records on their own. It is not possible to employ the doctor on the phone or a messenger platform, with questions about their file. At a meeting at the clinic they will be able to discuss what they want about their data, with their doctor.
4/26/2022 0:39:06	DERMATOLOGIST-APHRODISIOLOGIST	45-55	MALE	NO	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I believe it will take time to do so, and it will take a huge amount of information, especially for patients in the Region and not so much for patients of urban centers. The importance of managing patient health data, should begin in the field of primary health, and from the introduction of each patient to a C.Y., Hospital, Clinic, etc... always depending on the on-call health emergency departments.
4/26/2022 0:42:49	GYNAECOLOGIST - OBSTETRICIAN	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	No future role of doctors in guiding patients in managing health data
4/26/2022 0:44:27	DERMATOLOGIST-APHRODISIOLOGIST	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	They should guide and inform patients.
4/26/2022 0:46:05	Pediatric psychiatrist	45-55	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	With a positive sign
4/26/2022 0:52:54	GYNAECOLOGIST - OBSTETRICIAN	55-65	FEMALE	NO	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	The job of doctors is to treat patients, not to engage in computer science and data management. A waste of time.
4/26/2022 0:53:29	WITHOUT SPECIALTY	25-35	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	They should be able to explain and guide patients to access their own electronic health records.
4/26/2022 0:55:22	UROLOGIST	25-35	MALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Be able to share their data with their doctors in an easy digital environment and receive official information from a central server appropriate to the guidelines of each specialty.
4/26/2022 0:57:12	DERMATOLOGIST-APHRODISIOLOGIST	35-45	MALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	This is not the case.
4/26/2022 0:59:04	SURGEON	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	
4/26/2022 1:02:09	WITHOUT SPECIALTY	25-35	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	The management and aggregation of data of all specialties must be uniform in one electronic file and available to all health institutions.
4/26/2022 1:03:24	PNEUMONOLOGIST	35-45	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Wishful
4/26/2022 1:05:50	GYNAECOLOGIST - OBSTETRICIAN	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	.
4/26/2022 1:14:02	Vascular Surgeon	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	As far away as in u.s.

4/26/2022 1:16:12	PAEDIATRICIAN	65-75	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Need of specialised secretarial support!! have questions about the eventual improper use of health data by unauthorised bodies
4/26/2022 1:17:13	DERMATOLOGIST-APHRODISILOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I believe that the doctor loses his or her role by being stuck in an electrical service and trying to prescribe and create patient files. These require a good secretarial support. What will the doctor do to examine, inform or manage the computer?
4/26/2022 1:19:07	CARDIOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I don't see it.
4/26/2022 1:19:30	GYNAECOLOGIST - OBSTETRICIAN	55-65	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	How to find out
4/26/2022 1:31:56	GENERAL/FAMILY MEDICAL DOCTOR	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I don't know
4/26/2022 1:41:48	PATHOLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	.
4/26/2022 1:50:46	RADIOLOGIST	45-55	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Information-correct training of doctors first and foremost
4/26/2022 2:20:44	ORTHOPAEDIC	45-55	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	As a simple exhortation.
4/26/2022 2:24:50	PATHOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	The files aren't good because the evidence can be intercepted.
4/26/2022 2:29:18	GYNAECOLOGIST - OBSTETRICIAN	35-45	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	It would be ideal to have an electronic file of each patient containing all examinations and history of medications, surgeries etc. so that every doctor and of course the patient will have access when this is required.
4/26/2022 2:34:29	OTORINOLAROLOGOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	If there is an official document, ISA with a defined role and with limits will be the decisive role of each physician.
4/26/2022 3:15:36	PAEDIATRICIAN	55-65	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	The role of doctors is very important. They should encourage patients to have as full knowledge of their problem as possible, as this ensures their best cooperation.
4/26/2022 5:24:21	OPHTHALMOLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	Digitalisation is necessary. However, the skills of doctors are not financially rewarded
4/26/2022 5:36:42	PATHOLOGIST ANOTO	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	As long as patients' medical records will only have access to physicians and patients, and that banks and insurance companies, the future can be better.
4/26/2022 5:44:49	OPHTHALMOLOGIST	45-55	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's true.
4/26/2022 5:50:34	PLASTIC SURGEON	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	It's perfect!
4/26/2022 5:55:45	PAEDIATRICIAN	65-75	FEMALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	They just have to be familiar with HPs, which is not the case in the majority of patients.
4/26/2022 5:57:26	CARDIOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	
4/26/2022 6:04:06	BIOPATHOLOGIST	35-45	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Automatic update and easy access to an electronic file
4/26/2022 6:07:47	Pediatric psychiatrist	35-45	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't think they should be in their.
4/26/2022 6:10:52	PSYCHIATRIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	
4/26/2022 6:18:54	PATHOLOGIST	55-65	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Systematic and early improvement of their electronic skills
4/26/2022 6:28:15	GENERAL/FAMILY MEDICAL DOCTOR	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's a good idea.

4/26/2022 6:28:32	PATHOLOGIST	45-55	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	Doctors should encourage patients to keep a medical record, their medical history even in paper form and to regularly inform the family doctor about the course of their health, so that their electronic records are also updated. It would be good if patients were able to scan the
4/26/2022 6:31:34	UROLOGIST	45-55	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	With the corresponding secretarial support, it will be important.
4/26/2022 6:31:55	CARDIOLOGIST	45-55	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Excessive digitisation that always subject to data interception should not undermine the relationship of absolute trust among the patient and the doctor, as well the medical confidentiality.
4/26/2022 6:35:19	NEPHROLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	it is important
4/26/2022 6:38:04	PATHOLOGIST	55-65	MALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Subject to conditions
4/26/2022 6:44:52	ORTHOPAEDIC	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	With the installation of the electronic file, patients do not have to have full access to their health data, but they could have a key card — registration number — code, which will only give access to their electronic file, so that any doctor who needs any information can, through an electronic system, search for what he is looking for. And of course, he will be able to give the corresponding document to the patient, when requested.
4/26/2022 6:52:40	ANESTHESIOLOGIST	55-65	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It is preferable to be done via a Registrar or an e-file manager
4/26/2022 6:56:53	GYNAECOLOGIST - OBSTETRICIAN	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Fully digitalised
4/26/2022 7:01:40	OPHTHALMOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	INTERESTING BUT DIFFICULT
4/26/2022 7:05:00	Rheumatologist	65-75	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	They'd better see H.F. on their own.
4/26/2022 7:13:45	ENDOCRINOLOGIST	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is now necessary to use digital applications.
4/26/2022 7:15:08	PATHOLOGIST	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It is important
4/26/2022 7:16:09	RADIOLOGIST	55-65	FEMALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	GUIDED BY A SPECIFIC GROUP OF DOCTORS
4/26/2022 7:23:57	ORTHOPAEDIC	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	IT IS NECESSARY
4/26/2022 7:27:07	PSYCHIATRIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's not the doctor's job.
4/26/2022 7:35:45	PATHOLOGIST	65-75	FEMALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	There are special educational programs.
4/26/2022 7:36:26	PNEUMONOLOGIST	45-55	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	In principle, physicians should have access to their patients' health data. Doctors must not only consult their patients on access to their health data, but more importantly to protect this data from interception.
4/26/2022 7:43:24	HAEMATOLOGIST	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	No role in management. The electronic health record accessible from the internet on which different doctors can write substantially eliminates medical secrets. Like now with an electronic prescription with the national registration system, anyone can see which doctor prescribes which medications. There is no medical secret.
4/26/2022 7:46:35	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	ESTABLISHMENT OF TRUST
4/26/2022 7:51:20	GENERAL/FAMILY MEDICAL DOCTOR	65-75	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	that's right.
4/26/2022 7:52:03	GASTROENTEROLOGIST	35-45	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Promising
4/26/2022 7:53:04	OPHTHALMOLOGIST	45-55	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	I agree under conditions

4/26/2022 7:57:22	GENERAL/FAMILY MEDICAL DOCTOR	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is important
4/26/2022 7:58:40	PNEUMONOLOGIST	45-55	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	It's not a medical role.
4/26/2022 8:03:07	RADIOLOGIST	55-65	MALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	Doctors now need to acquire digital skills so that they can handle digital data such as medical records, images such as CT, magnetic, etc.
4/26/2022 8:07:49	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	The doctor must guide and manage the health data of each uninsured person and only him.
4/26/2022 8:07:55	CARDIOLOGIST	55-65	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	IT'S HARD
4/26/2022 8:11:00	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	difficult
4/26/2022 8:11:10	HAEMATOLOGIST	65-75	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	First of all, full support from the state is needed for the creation of electronic patient files (in Greek and English) and then these files should be fully informed and sent anywhere (in and outside the country) the patient needs, aiming at patient-centred care, for the good of the patient.
4/26/2022 8:13:44	PATHOLOGIST	55-65	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Important
4/26/2022 8:20:47	BIOPATHOLOGIST	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	IT IS NOT EASY TO USE BY THE ELDERLY.
4/26/2022 8:22:41	RADIOLOGIST	35-45	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	simple and understandable
4/26/2022 8:23:21	GYNAECOLOGIST - OBSTETRICIAN	35-45	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Ideally, the patient has access to health data after the necessary information provided by the doctor.
4/26/2022 8:25:55	PATHOLOGIST	55-65	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't think the doctor should deal with the access thing unless asked. As every citizen knows about accessing the TaxisNet app, they should also know about their personal file. So it's a matter for the state (and itself) to be informed.
4/26/2022 8:31:09	Vascular Surgeon	45-55	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Electronic archiving of patients is a daily routine.Remote access as well. Ideally, it would be possible to have a single registration platform for patients, accessible to all health professionals.
4/26/2022 8:32:05	OPHTHALMOLOGIST	45-55	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	Doctors should find a way after being informed and trained themselves, to help patients understand how they will be useful to manage their health data.
4/26/2022 8:39:28	GENERAL/FAMILY MEDICAL DOCTOR	45-55	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	That's important. The digitalisation of health data requires doctors, especially the PHC, to communicate with their patients in this field.
4/26/2022 8:42:17	PATHOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is important
4/26/2022 8:42:55	PATHOLOGIST	45-55	MALE	YES	YES	Yes, but I can only see patient health data	Yes, they can see their records and can transfer their data to other healthcare providers	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	The patient may have access to his file independently from the doctor.
4/26/2022 8:43:08	UROLOGIST	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I believe that the database of each patient's personal data should be accessible equally to the patient himself and to the attending physician with the patient's consent. As far as the management of this file is concerned, I believe that the doctor should not have any involvement, let alone in the guidance of the patient.
4/26/2022 8:45:22	NEUROLOGIST	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Important is the organisation and access to an electronic file, also the reminder of medications, the monitoring by the home of vital signs and parameters such as blood glycosis, as well as the evaluation of life quality parameters such as sleep quality
4/26/2022 8:45:56	BIOPATHOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	I DON'T THINK IT'S THE DOCTOR'S OBLIGATIONS TO GUIDE HIS PATIENTS, HE'S TOO BUSY WITH WHAT SERIOUS THINGS YOU SHOULD DO FROM A LETTER SUPPORT.

4/26/2022 8:48:32	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is important
4/26/2022 8:49:55	GENERAL/FAMILY MEDICAL DOCTOR	55-65	MALE	NO	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Telemedicine, a very important tool in the near future
4/26/2022 8:52:25	PAEDIATRICIAN	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	
4/26/2022 8:54:13	PATHOLOGIST	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Improving the digital file of the national health system and especially the laboratories to update the patient's electronic file with the results of the examinations.
4/26/2022 8:54:43	ENDOCRINOLOGIST	65-75	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Bleak
4/26/2022 8:55:54	Oncologist	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Digital
4/26/2022 9:04:35	OPHTHALMOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It would be good to do this, but it might be time-consuming and difficult for a private doctor.
4/26/2022 9:07:20	GENERAL/FAMILY MEDICAL DOCTOR	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It's OK.
4/26/2022 9:11:12	GYNAECOLOGIST - OBSTETRICIAN	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	No involvement of the doctor is required. This is a problem of the insurance company. The doctor is neither a secretary nor an archivist.
4/26/2022 9:13:39	DERMATOLOGIST-APHRODISIOLOGIST	55-65	MALE	NO	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	They need to be informed and acquire skills.
4/26/2022 9:14:47	PSYCHIATRIST	35-45	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It is important
4/26/2022 9:16:44	PAEDIATRICIAN	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Explain — inform — about the critical and key elements of the problem. Ensure the confidentiality of the data and ensure that their use is solely for medical reasons.
4/26/2022 9:17:37	CARDIOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Of great importance
4/26/2022 9:17:44	RADIODIAGNOSIST	55-65	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	It's not an exclusive medical project, there's a well-trained managerial staff.
4/26/2022 9:19:25	ORTHOPAEDIC	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	To make it easier for patients to access their records
4/26/2022 9:19:36	OPHTHALMOLOGIST	55-65	FEMALE	NO	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT WOULD BE GREAT IF PATIENTS WERE IMPROVING THEIR DIGITAL SKILLS.
4/26/2022 9:20:24	CARDIOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	to be achieved
4/26/2022 9:22:59	GENERAL/FAMILY MEDICAL DOCTOR	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Advisory
4/26/2022 9:23:37	GENERAL/FAMILY MEDICAL DOCTOR	45-55	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Very good
4/26/2022 9:25:46	GENERAL/FAMILY MEDICAL DOCTOR	45-55	MALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Important, but it takes extra time, which in the public health system is quite difficult.
4/26/2022 9:27:44	GENERAL/FAMILY MEDICAL DOCTOR	35-45	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	The Electronic Health File is necessary with access to him by both the treating/family physician and the patient.
4/26/2022 9:30:20	OPHTHALMOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Skip to content
4/26/2022 9:30:35	PSYCHIATRIST	65-75	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	We don't just need technical knowledge; we need to have time and desire and know how to communicate with our patients.
4/26/2022 9:31:05	GENERAL/FAMILY MEDICAL DOCTOR	35-45	FEMALE	NO	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Necessary..and imperative

4/26/2022 9:31:15	GYNAECOLOGIST - OBSTETRICIAN	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	
4/26/2022 9:31:20	ENDOCRINOLOGIST	55-65	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Primary
4/26/2022 9:31:57	OPHTHALMOLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	THE DOCTOR HAS TIME JUST TO COMPLY WITH THE LEGAL REQUIREMENTS OF THE EUROPEAN GDPR DIRECTIVE.
4/26/2022 9:33:41	GYNAECOLOGIST - OBSTETRICIAN	35-45	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	I think it would be good to have a digital list of medicines for each patient. That would make it easier for all colleagues. Electronic patient records will certainly be established someday, of course the possibility of accessing the electronic file will have to follow the rules already in place.
4/26/2022 9:34:24	GASTROENTEROLOGIST	35-45	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Very important
4/26/2022 9:36:15	NEUROLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	The medical role is and will be the medical practice, whatever this means.
4/26/2022 9:37:14	GYNAECOLOGIST - OBSTETRICIAN	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	I don't know
4/26/2022 9:37:23	PAEDIATRICIAN	45-55	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	THE DOCTOR TO TRAIN IN THE USE OF AN ELECTRONIC DEVICE AND TO PROVIDE ACCESS TO HEALTH DATA RELATING TO THE PATIENT KEEPING ALL DATA PROTECTION PROTOCOLS
4/26/2022 9:41:26	HAEMATOLOGIST	65-75	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	The Role of Doctors is essential
4/26/2022 9:43:47	SURGEON	55-65	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is important
4/26/2022 9:45:25	Rheumatologist	55-65	FEMALE	NO	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	With better knowledge of technology from doctors and patients
4/26/2022 9:47:54	GENERAL/FAMILY MEDICAL DOCTOR	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Doctors should first be informed because without informed doctors you can't inform the patients.
4/26/2022 9:47:57	PATHOLOGIST	35-45	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	IMPORTANT AND DIFFICULT

4/26/2022 9:48:36	ANESTHESIOLOGIST	55-65	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	I don't understand the question.
4/26/2022 9:48:40	WITHOUT SPECIALTY	25-35	MALE	NO	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	I don't know, rhetorical question?
4/26/2022 9:49:58	OPHTHALMOLOGIST	35-45	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	
4/26/2022 9:53:48	PATHOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	The health record has to be common to the whole health system, which will be updated with automated patient examinations, with access to the patient and the doctor
4/26/2022 9:56:55	NEUROLOGIST	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	IT'S VERY DIFFICULT. THE DOCTOR CANNOT BE CHARGED WITH THAT ROLE AS WELL.
4/26/2022 9:57:26	PATHOLOGIST	35-45	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't know
4/26/2022 9:58:23	CARDIOLOGIST	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Implementation of a single pan-Hellenic electronic platform with remotely accessible health data
4/26/2022 9:58:42	ENDOCRINOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Utopia
4/26/2022 10:00:37	PATHOLOGIST	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT'S A GOOD IDEA.
4/26/2022 10:01:05	SURGEON	45-55	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Doctors must contribute so that every person has and is aware of the use of the personal electronic health record.
4/26/2022 10:02:14	Vascular Surgeon	45-55	MALE	NO	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Very important obligation
4/26/2022 10:12:17	BIOPATHOLOGIST	65-75	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	It is essential,
4/26/2022 10:17:06	PATHOLOGIST	65-75	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	THE ROLE OF DOCTORS IS TO TREAT PATIENTS, NOT TO MANAGE INCOMING AND OUTGOING DATA. DOCTORS ARE NOT WRITERS.
4/26/2022 10:18:49	Nuclear Medicine Phys	45-55	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Complementary, teams of specialists should be set up to guide patients and help doctors in this direction.
4/26/2022 10:19:20	PSYCHIATRIST	55-65	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	it is important
4/26/2022 10:20:08	DERMATOLOGIST-APHRODISIOLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	The role of doctors should be crucial in guiding their patients in managing
4/26/2022 10:22:01	NEUROLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Basic guidance for apps to be downloaded or sites to visit
4/26/2022 10:23:47	PATHOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	data management is not the role of the doctor.
4/26/2022 10:26:55	CARDIOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	IT IS IMPORTANT
4/26/2022 10:27:23	GASTROENTEROLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	They have to play an important role.
4/26/2022 10:29:01	GYNAECOLOGIST - OBSTETRICIAN	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	AS IN OTHER EUROPEAN COUNTRIES, THIS ROLE BELONGS TO THE STATE.
4/26/2022 10:35:07	GYNAECOLOGIST - OBSTETRICIAN	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Patients have the right to know their state of health and to participate in the decision-making regarding their condition; doctors need to be transparent about our treatments.
4/26/2022 10:35:31	PAEDIATRICIAN	55-65	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is a matter of central politics, not of each individual physician.

4/26/2022 10:36:10	ORTHOPAEDIC	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	A special instrument for informing patients and doctors should be created.
4/26/2022 10:36:56	NEUROLOGIST	45-55	FEMALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	In order for the management of digital data to occur, all health services must be digital. Now some are digital and some manuscripts.
4/26/2022 10:38:36	ANESTHESIOLOGIST	55-65	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	All doctors can help their patients access the medical records.
4/26/2022 10:39:33	PSYCHIATRIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Supervisory and guidance
4/26/2022 10:43:45	THORACIC SURGEON	55-65	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is not the job of patients to manage the file of their health data, but only to give their doctor permission to manage and inform them.
4/26/2022 10:44:26	PSYCHIATRIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Very important
4/26/2022 10:48:28	ALLERGOLOGIST	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Assisting
4/26/2022 10:50:57	Oral and Maxillofacial	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	In order for doctors to guide their patients in managing their health data, they must first familiarise themselves with the electronic file software. This requires redesigning the user interface based on the actual requirements of medical practice rather than the developer, as well as comprehensive documentation and support in all steps.
4/26/2022 10:51:07	CARDIOLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I have no idea
4/26/2022 10:51:23	PATHOLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	It is important
4/26/2022 10:53:40	ANESTHESIOLOGIST	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	A complete electronic patient file is needed in a single system where each patient, when you put their national health code in any hospital's system, to be able to have access to their history, the previous tests, so that we have as doctors full control of the patients in order to be able to provide proper care
4/26/2022 10:55:04	PATHOLOGIST	45-55	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Interesting but it will need training and motivation.
4/26/2022 10:57:25	PATHOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	The doctor should have a coordinating role in data management
4/26/2022 10:57:33	GYNAECOLOGIST - OBSTETRICIAN	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	PRIMARY AND BASIC
4/26/2022 10:59:26	GENERAL/FAMILY MEDICAL DOCTOR	35-45	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	That's important.
4/26/2022 11:00:48	PATHOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's indifferent.
4/26/2022 11:04:07	RADIOLOGIST	25-35	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	The Role of Doctors is essential
4/26/2022 11:05:37	BIOPATHOLOGIST	55-65	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	Simple and standard.
4/26/2022 11:08:03	GASTROENTEROLOGIST	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	THEY NEED TO INFORM AND HELP PATIENTS.
4/26/2022 11:08:24	PATHOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Personal Medical Officer as a Health Advisor
4/26/2022 11:09:58	PATHOLOGIST ANOTO	65-75	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Crucial
4/26/2022 11:11:56	PNEUMONOLOGIST	55-65	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I DON'T KNOW
4/26/2022 11:18:43	RADIOLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	It's important.
4/26/2022 11:23:34	ORTHOPAEDIC	45-55	MALE	NO	YES	No, I have no access to electronic health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	...

4/26/2022 11:29:46	GYNAECOLOGIST - OBSTETRICIAN	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	ESSENTIAL TO HAVE KNOWLEDGE, AND CO-RESPONSIBLE FOR PERIODIC HEALTH CHECKS
4/26/2022 11:42:35	PATHOLOGIST	35-45	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	low on the list of responsibilities
4/26/2022 11:49:43	ORTHOPAEDIC	55-65	MALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	
4/26/2022 11:58:45	PNEUMONOLOGIST	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Patients should have free access to their health data, and doctors should be the ones who record them.
4/26/2022 12:05:16	GASTROENTEROLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	WE ARE DOCTORS, NOT WRITERS.
4/26/2022 12:11:11	GENERAL/FAMILY MEDICAL DOCTOR	45-55	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	VERY USEFUL
4/26/2022 12:12:25	PATHOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	Yes, they can see their records and can transfer their data to other healthcare providers	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	AS THE MAESTRO REGULATES WHEN EACH INSTRUMENT WILL PLAY AND HOW MUCH
4/26/2022 12:13:20	GYNAECOLOGIST - OBSTETRICIAN	55-65	MALE	NO	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Assistive-cooperative
4/26/2022 12:19:36	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	.
4/26/2022 12:24:14	ORTHOPAEDIC	55-65	MALE	YES	YES	No, I have no access to electronic health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Essential role but maybe other actors with more technological training
4/26/2022 12:25:12	GASTROENTEROLOGIST	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't know
4/26/2022 12:25:29	PNEUMONOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	It is difficult taken into account the time limits defined by the government
4/26/2022 12:28:39	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is important
4/26/2022 12:42:30	PAEDIATRICIAN	55-65	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	BEFORE NOW, I THINK IT'S QUITE DIFFICULT.
4/26/2022 13:00:06	CARDIOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	With the full development of the electronic file the role of the doctor will be very essential in guiding patients in managing their health data.
4/26/2022 13:04:19	PATHOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	it's better than that.
4/26/2022 13:06:05	GENERAL/FAMILY MEDICAL DOCTOR	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	With these electronics sometime it's gonna be all messy, remember it for me.
4/26/2022 13:13:58	ORTHOPAEDIC	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	DOCTORS CANNOT GUIDE PATIENTS IN MANAGING THEIR HEALTH DATA. IT IS WORK THAT SHOULD BE SUPPORTED BY OTHER BODIES, NOT BY THE DOCTOR. THE DOCTOR CANNOT HAVE THE ROLE OF "MANAGER" OF THE PATIENT'S ELECTRONIC MEDICAL FILE, AND THE PATIENT TO BE THE "USER".
4/26/2022 13:14:33	Nuclear Medicine Phys	65-75	MALE	NO	NO	Yes, but I can only see patient health data	Yes, they can see their records and can transfer their data to other healthcare providers	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Needs undergraduate computer training
4/26/2022 13:17:53	NEUROLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	What role?
4/26/2022 13:21:29	PAEDIATRICIAN	65-75	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	WITH PROPER ACCESS TO THE PATIENT'S FILE, FOR THE BENEFIT OF THE PATIENT MAINLY.
4/26/2022 13:25:23	RADIATOR	65-75	MALE	NO	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Active participation
4/26/2022 13:28:53	GYNAECOLOGIST - OBSTETRICIAN	55-65	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	You don't need a role. Patients with their national health identification code must have access to their files, at least to outpatients.
4/26/2022 13:30:20	CARDIOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Simple access
4/26/2022 13:35:55	GASTROENTEROLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Training doctors to access the electronic file of patients
4/26/2022 13:37:07	PATHOLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT'S SOMETHING I THINK IT'S WRONG TO BE A MEDICAL ACT.

4/26/2022 13:43:21	PATHOLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT IS IMPORTANT
4/26/2022 13:45:09	OTORINOLARGOLOGIST	65-75	MALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Encourage patients to provide correct information and data from their history.
4/26/2022 13:47:06	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	IT IS SELF-EXISTENT
4/26/2022 13:47:10	PNEUMONOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It takes a lot of time for the doctor to explain to them, but he will need to be trained himself. But guiding patients in data management should be the job of skilled staff. The doctor doesn't have that luxury of time.
4/26/2022 13:55:26	PATHOLOGIST	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It should be more meaningful and informative. Most patients are unaware of the existence of the electronic file.
4/26/2022 13:55:27	ORTHOPAEDIC	65-75	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	I don't know
4/26/2022 14:04:06	GENERAL/FAMILY MEDICAL DOCTOR	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Very important
4/26/2022 14:15:23	WITHOUT SPECIALTY	35-45	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Yes, but in special cases in consultation with attending physicians, patients may have access to their electronic file. Doctors should also have access as they will be legally able to access only as therapists not in general and whenever they wish.
4/26/2022 14:16:18	OCCUPATIONAL DOCT	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	Not Necessary
4/26/2022 14:18:03	PSYCHIATRIST	65-75	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	USEFUL, NECESSARY PERSPECTIVE.
4/26/2022 14:18:36	NEUROLOGIST	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	GET AWAY FROM US!
4/26/2022 14:21:15	PATHOLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It needs a preparation because I believe that there is not yet proper education, especially in patients of older age.
4/26/2022 14:22:33	CARDIOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Important and necessary
4/26/2022 14:26:50	DERMATOLOGIST-APHRODISIOLOGIST	55-65	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	Information to be able to find her personal data
4/26/2022 14:33:08	PAEDIATRICIAN	45-55	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Simple apps that everyone can understand and update
4/26/2022 14:34:19	OTORINOLARGOLOGIST	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Helper kind of stays advice from the doctor
4/26/2022 14:36:41	CARDIOLOGIST	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	With a high sense of duty and appeal to know-how
4/26/2022 14:46:33	DERMATOLOGIST-APHRODISIOLOGIST	55-65	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I don't know the future.
4/26/2022 14:49:14	Vascular Surgeon	35-45	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Ambitious Plan with a Perspective
4/26/2022 14:59:59	ORTHOPAEDIC	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I don't think this should be done in a hospital. We're already doing enough beyond our medical duties.
4/26/2022 15:04:08	NEUROLOGIST	55-65	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Helpful and effective
4/26/2022 15:05:36	WITHOUT SPECIALTY	25-35	FEMALE	NO	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Doctors should have autonomy and recognise our deficit in terms of communication with the patient, empathy and overall approach to the needs within which digitalisation is in order to give feedback to global surveys.

4/26/2022 15:07:00	HAEMATOLOGIST	45-55	FEMALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Electronic health record to open to citizens and physicians
4/26/2022 15:09:47	ALLERGOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Be able to easily help and inform their patients on how to gain access to their health data
4/26/2022 15:12:49	PNEUMONOLOGIST	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It is important
4/26/2022 15:12:50	ENDOCRINOLOGIST	55-65	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Essential
4/26/2022 15:13:26	PATHOLOGIST	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It would be advisable to train doctors to make it easier for their patients and colleagues to manage electronic medical records.
4/26/2022 15:16:07	OPHTHALMOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It's an optimism
4/26/2022 15:28:08	OPHTHALMOLOGIST	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	DOCTORS HAVE TO UPDATE THE PATIENT'S ELECTRONIC INDIVIDUAL FILE AND HE CAN ACCESS HIS HEALTH DATA AND BE ABLE TO INFORM ANY DOCTOR HE WANTS ABOUT HIS HISTORY.
4/26/2022 15:35:48	HAEMATOLOGIST	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Each patient should have a unique registration number (e.g. AMKA). Every doctor should be able to access the patient's electronic file in order to inform you about his/her history, medication, previous hospitalisations, etc.
4/26/2022 15:37:51	GYNAECOLOGIST - OBSTETRICIAN	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	The obligation of doctors is to enable their patients to manage their health data and transfer it to other doctors if needed.
4/26/2022 15:41:55	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It would be quite helpful to have a "central" patient's file showing all hospitalisations with the corresponding informatives, all the medications they have received, as well as information on their history. This saves time and at the same time makes it easier in cases where there is no immediate family environment to provide information. In the health data management section, general practitioners/family doctors play an important role as they have more systematic and integrated contact with people and therefore have the scope to discuss with their patients and guide them on how to manage their medical records and decisions regarding their health such as dnr and organ donation.
4/26/2022 15:44:25	OCCUPATIONAL DOCT	45-55	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't envision that.
4/26/2022 15:57:58	OCCUPATIONAL DOCT	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	Essential
4/26/2022 16:08:07	PSYCHIATRIST	35-45	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	
4/26/2022 16:13:56	RADIOLOGIST	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Very important
4/26/2022 16:17:39	DERMATOLOGIST-APHRODISILOGIST	45-55	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Difficult but very important
4/26/2022 16:21:29	OPHTHALMOLOGIST	35-45	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I haven't thought about it.
4/26/2022 16:24:02	OTORINOLARGOLOGIST	35-45	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I don't see it as a medical obligation.

4/26/2022 16:29:09	ORTHOPAEDIC	55-65	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	no
4/26/2022 16:36:18	GENERAL/FAMILY MEDICAL DOCTOR	55-65	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	INFORMATIVE
4/26/2022 17:04:18	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	I don't see anything.
4/26/2022 17:07:39	GENERAL/FAMILY MEDICAL DOCTOR	45-55	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	If each doctor has access to the electronic patient file, they will be able to communicate with other specialties for the same patient and immediately inform each patient. It is sufficient to have training, information and perhaps specialisation of some medical specialties in the field of know-how and management of electronic media.
4/26/2022 17:36:27	Rheumatologist	65-75	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It'll be helpful.
4/26/2022 17:44:43	CARDIOLOGIST	55-65	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is necessary and necessary to make a central electronic file platform accessible also for patients to be flexible functionally secure and connected between specialties.
4/26/2022 17:47:25	PSYCHIATRIST	65-75	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	IT'S A GOOD IDEA.
4/26/2022 17:48:35	OPHTHALMOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	DIFFICULT
4/26/2022 18:01:06	NEPHROLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	there should be specialised service to guide patients, not to be the doctors.
4/26/2022 18:03:04	OPHTHALMOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I agree
4/26/2022 18:04:58	Vascular Surgeon	55-65	MALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Not Necessary
4/26/2022 18:06:13	OPHTHALMOLOGIST	45-55	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	
4/26/2022 18:17:44	PATHOLOGIST	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	THE ROLE OF DOCTORS WILL UNDOUBTEDLY BE IMPORTANT.
4/26/2022 18:18:17	ORTHOPAEDIC	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	LINKING ALL HEALTH CARE PROVIDERS AND PATIENTS ON A SINGLE FULL HEALTH FILE, WITH THE OBLIGATION TO HAVE FULL INFORMATION FROM ALL OF US ABOUT EVERY CONTACT OF THE PATIENT WITH A HEALTH PROVIDER
4/26/2022 18:26:13	HAEMATOLOGIST	55-65	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	Proportional to the directions of the Isles follow them
4/26/2022 18:31:39	PNEUMONOLOGIST	55-65	FEMALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't have a picture, I'd like to know more.
4/26/2022 18:38:57	DERMATOLOGIST-APHRODISIOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Patients should be able to monitor their health record data. Doctors can exercise an advisory role but the burden of their obligations does not allow them to assume the responsibility of the state-owned mentor.
4/26/2022 18:45:39	Oncologist	65-75	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	very important
4/26/2022 18:46:26	PAEDIATRICIAN	55-65	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	The medical industry needs less bureaucracy, even in electronic form.
4/26/2022 18:57:26	GASTROENTEROLOGIST	45-55	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	
4/26/2022 18:58:13	PAEDIATRICIAN	45-55	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	More organised and efficient...
4/26/2022 19:04:55	CARDIOLOGIST	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Correct information to doctors

4/26/2022 19:06:06	OTTORINOLARGOLOG OLOGIST	35-45	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	A little guidance should be provided.
4/26/2022 19:08:50	Rheumatologist	35-45	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	THIS IS NOT THE CASE.
4/26/2022 19:16:10	GYNAECOLOGIST - OBSTETRICIAN	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Very difficult
4/26/2022 19:23:44	ORTHOPAEDIC	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Advisory
4/26/2022 19:37:09	GYNAECOLOGIST - OBSTETRICIAN	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT IS IMPORTANT
4/26/2022 19:42:54	PATHOLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Once doctors are informed, they will be able to guide the patients, but they need to be informed by the state as well.
4/26/2022 19:43:45	GYNAECOLOGIST - OBSTETRICIAN	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It's a good idea.
4/26/2022 19:49:52	SURGEON	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Technical personnel are needed to provide assistance services. The role of the doctor should be advisory.
4/26/2022 19:50:21	PSYCHIATRIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	IT IS IMPORTANT
4/26/2022 19:58:42	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	More active in discussing options, but not so guiding
4/26/2022 20:09:47	OPHTHALMOLOGIST	65-75	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Interchanger between data and patient
4/26/2022 20:28:10	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	time consuming
4/26/2022 20:40:21	GASTROENTEROLOGI ST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	I would like the doctor to inspire such confidence that the patient rarely resides to the internet.
4/26/2022 20:42:13	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	excellent
4/26/2022 20:47:31	CARDIOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Consultative
4/26/2022 20:48:07	PAEDIATRICIAN	35-45	FEMALE	NO	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	N/A
4/26/2022 21:03:23	GYNAECOLOGIST - OBSTETRICIAN	65-75	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	CRITICAL.IMPORTANT.SUBSTANTIATION. Usefull
4/26/2022 21:17:23	PSYCHIATRIST	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Doctors need to guide patients to treat their health data as part of their overall self-care actong with respect
4/26/2022 21:18:50	CARDIOLOGIST	55-65	FEMALE	NO	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	Building a complete history of the patient and easy access to it for all therapists is a prerequisite for proper practice of medicine. There is no examination or prescribing without access to the patient's complete history, so it should be opened at the start of the visit. The current structure of the historian is difficult to use and hostile. After the initial completion of the citizen's history until then I propose the direct admission of all examinations by the conductors. Since the general doctors and pathologists are few there is no time and way to pass the history of the citizens into the file, and we will not make the medical secretaries. This will also lead to economies of scale since it will reduce the volume of tests, because today one doctor does not know what the other doctor has seen since some have removed the booklet! This is from someone who has already worked for 25 years in the primary sector in both the private and public sectors.
4/26/2022 21:26:41	GYNAECOLOGIST - OBSTETRICIAN	65-75	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Very difficult
4/26/2022 21:45:21	WITHOUT SPECIALTY	25-35	FEMALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Very important
4/26/2022 21:48:24	PATHOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It's important.
4/26/2022 22:02:28	SURGEON	45-55	MALE	YES	YES	Yes, but I can only see patient health data	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Terms and conditions of use

4/26/2022 22:04:20	OPHTHALMOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	THEY ARE NOT IN OUR JURISDICTION. OUR TASK IS THE EXAMINATION AND THE COURAGE OF OUR PATIENTS. THAT'S WHAT WE'VE BEEN STUDYING AND THAT'S WHAT WE HAVE TO SERVE.
4/26/2022 22:04:23	ORTHOPAEDIC	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Less important
4/26/2022 22:40:42	OTORINOLARGOLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	I have no idea. No one has ever guided me, so how can I guide my patients?
4/26/2022 22:58:00	CARDIOLOGIST	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Except for medical obligations!
4/26/2022 23:13:06	PATHOLOGIST	65-75	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	as an extra
4/26/2022 23:21:46	GENERAL/FAMILY MEDICAL DOCTOR	35-45	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Guidance to be carried out by other health professionals
4/26/2022 23:36:36	GYNAECOLOGIST - OBSTETRICIAN	45-55	FEMALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	In case of a very simple system, doctors could play the role of a coach. The system has to be simple so that it is easily understood by doctors and patients and does not require much time for the procedure.
4/27/2022 0:12:56	RADIOLOGIST	35-45	FEMALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	I can't imagine that old people will be able to process it.
4/27/2022 0:21:14	ORTHOPAEDIC	55-65	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It's okay.
4/27/2022 0:22:52	DERMATOLOGIST - APHRODISIOLOGIST	35-45	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	
4/27/2022 1:46:13	ENDOCRINOLOGIST	65-75	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	THAT'S HARD. IT WILL BE ON THE WEIGHT OF THE PATIENT'S HEALTH PROBLEM.
4/27/2022 2:04:22	OPHTHALMOLOGIST	35-45	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	A fervent effort to guide
4/27/2022 2:54:27	OPHTHALMOLOGIST	65-75	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Important
4/27/2022 3:25:58	OCCUPATIONAL DOCT	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	It's not our role.
4/27/2022 7:21:58	PATHOLOGIST	55-65	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	funding is needed for certified personal data usage.The doctor has no time for this tool! also funding information programs of digital know-how!
4/27/2022 7:22:48	GYNAECOLOGIST - OBSTETRICIAN	55-65	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It can help under conditions.
4/27/2022 7:39:16	BIOPATHOLOGIST	65-75	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	IT'S VERY GOOD.
4/27/2022 7:59:01	NEUROLOGIST	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is problematic
4/27/2022 7:59:54	GENERAL/FAMILY MEDICAL DOCTOR	65-75	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	They don't have time...
4/27/2022 8:32:13	OTORINOLARGOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Not required but would help
4/27/2022 8:46:19	OPHTHALMOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	
4/27/2022 9:00:46	PNEUMONOLOGIST	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Necessary
4/27/2022 9:07:18	GYNAECOLOGIST - OBSTETRICIAN	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	IN VERY FEW CASES THERE ARE RECORDED DATA IN THE PATIENT'S INDIVIDUAL HEALTH FILE
4/27/2022 9:13:47	OTORINOLARGOLOGIST	45-55	MALE	NO	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	consultative participation only on call, patients must have full access to their data

4/27/2022 9:26:11	PATHOLOGIST	25-35	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	MORE ACTIVE WITH MORE TIME FOR EVERY PATIENT
4/27/2022 9:31:41	OTTORINOLARGOLOGOLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's important. We need to inform all the doctors.
4/27/2022 9:32:07	Vascular Surgeon	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Critical importance for the success of the program
4/27/2022 9:32:21	BIOPATHOLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Important but difficult to implement due to a large shortage of staff in hospitals.
4/27/2022 9:41:36	OPHTHALMOLOGIST	55-65	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	MAINTAINING AND RESPONSIBLE INFORMATION TO PATIENTS WHO WANT
4/27/2022 9:48:17	OTTORINOLARGOLOGOLOGIST	55-65	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	useful and Necessary
4/27/2022 9:57:26	Oncologist	55-65	MALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It's a good idea.
4/27/2022 10:16:25	OPHTHALMOLOGIST	45-55	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	TO ENABLE PHYSICIANS TO HELP THEIR PATIENTS TO MANAGE THEIR HEALTH DATA, ALTHOUGH THE INITIAL/BASIC INFORMATION OF PATIENTS ON HOW TO ACCESS THEIR DATA SHOULD BE DONE BY OTHER SPECIALISED HEALTH AND INFORMATION PROVIDERS. BESIDES, THIS SHOULD BE AN ONGOING PROCESS OF PATIENTS INFORMATION AND TRAINING.
4/27/2022 10:21:35	GENERAL/FAMILY MEDICAL DOCTOR	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	I have doubts on whether patients can manage their health data
4/27/2022 10:34:47	CARDIOLOGIST	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	IT WILL BE AN IMPORTANT PROGRESS.
4/27/2022 10:39:32	PSYCHIATRIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	As is the case with electronic prescribing today.
4/27/2022 10:39:41	PSYCHIATRIST	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT HAS TO BE DONE ON A DAILY BASIS.
4/27/2022 10:47:27	CARDIOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	BASIC AND CONSULTANT
4/27/2022 11:12:36	GYNAECOLOGIST - OBSTETRICIAN	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I THINK IT'S A LETTER JOB.
4/27/2022 11:13:51	OTTORINOLARGOLOGOLOGIST	35-45	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	
4/27/2022 11:34:49	PATHOLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	To have access to the complete history of my patients.
4/27/2022 11:50:42	OTTORINOLARGOLOGOLOGIST	45-55	FEMALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Helpful
4/27/2022 11:53:03	PSYCHIATRIST	55-65	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	It may help with doctor-patient cooperation.
4/27/2022 12:18:39	PATHOLOGIST ANOTO	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	IT'S A GOOD IDEA.
4/27/2022 12:19:31	GASTROENTEROLOGIST	65-75	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	A simple and easily manageable electronic file is needed, which can also be accessed by the patient. There is a need for enough patient's training, which can be done by doctors or specialist on computer sciences.
4/27/2022 12:22:07	PATHOLOGIST	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Complete connection of the electronic envelope and access to both physicians of all specialties and patients
4/27/2022 12:22:53	DERMATOLOGIST-APHRODISILOGIST	55-65	FEMALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is important
4/27/2022 12:41:34	OTTORINOLARGOLOGOLOGIST	35-45	FEMALE	NO	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	The organisation's data manager must do this.

4/27/2022 13:02:18	CARDIOLOGIST	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It's brilliant.
4/27/2022 13:33:01	GYNAECOLOGIST - OBSTETRICIAN	55-65	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	The role of the doctor is primary.
4/27/2022 13:38:33	RADIOLOGIST	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	Digital "file" of patients to which patients and doctors have access. The use of this "data" is strictly personal and the role of the doctor must ensure this status.
4/27/2022 13:38:54	NEPHROLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	It's hard to charge the doctor & with this project
4/27/2022 13:41:15	DERMATOLOGIST - APHRODISIOLOGIST	35-45	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	The role of doctors is very important in guiding patients and informing them about how they can handle their personal data.
4/27/2022 13:50:41	Rheumatologist	65-75	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	ANYONE WITH THE PATIENT'S PERMISSION CAN GET INTO THE ELECTRONIC HEALTH FOLDER.
4/27/2022 13:59:51	NEUROLOGIST	35-45	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	SIMPLIFIED MANAGEMENT SYSTEM
4/27/2022 14:10:59	PATHOLOGIST ANOTO	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	Yes, they can see their records and can transfer their data to other healthcare providers	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	Doctors should not guide patients in managing health data.
4/27/2022 14:22:41	GENERAL/FAMILY MEDICAL DOCTOR	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	IMPROVING DIGITAL SKILLS — IMPROVING REWARDS
4/27/2022 14:44:24	Vascular Surgeon	25-35	MALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Doctors need to inform patients about the capabilities of electronic systems, but the implementing/management bodies must take on the role of trainer. Ideally, the citizen will have been trained/informed by an active program of the institution before contacting the doctor.
4/27/2022 14:54:40	OPHTHALMOLOGIST	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It's absolutely necessary!
4/27/2022 16:16:18	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	For all these things to be done, there should be provision of support, so we need to know about how much money you are talking about.
4/27/2022 16:31:13	SURGEON	65-75	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	NA EINAI COMPULSORY
4/27/2022 16:38:18	OTORINOLARGOLOG OLOGIST	45-55	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	It's very useful.
4/27/2022 16:41:23	PAEDIATRICIAN	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Part of the job
4/27/2022 16:52:04	GYNAECOLOGIST - OBSTETRICIAN	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	.
4/27/2022 17:01:50	UROLOGIST	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	PHYSIOLOGICAL DEVELOPMENT, PROPER FORMAL INSTITUTIONALISED EDUCATION IS NEEDED ALSO FOR DOCTORS
4/27/2022 17:06:59	PATHOLOGIST	55-65	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	It will be possible to review all data in the dossier and guide decisions on testing and therapeutic interventions
4/27/2022 17:13:47	BIOPATHOLOGIST	55-65	MALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	TO WRITE HEALTH DATA ACCURATELY AND TRUELY.
4/27/2022 17:32:45	PSYCHIATRIST	55-65	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	positive as a good act
4/27/2022 18:46:43	CARDIOLOGIST	55-65	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	I haven't dealt with
4/27/2022 18:48:01	WITHOUT SPECIALTY	35-45	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	The process can be done easily, with protection of personal data and quickly.
4/27/2022 18:50:04	PATHOLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	Doctors are not secretaries.

4/27/2022 19:10:44	PAEDIATRICIAN	55-65	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Good and high quality.
4/27/2022 19:22:12	CARDIOLOGIST	55-65	MALE	NO	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	That's the job of the electronic file provider, not the doctor.
4/27/2022 19:27:35	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Skip to content
4/27/2022 19:27:45	GYNAECOLOGIST - OBSTETRICIAN	55-65	FEMALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Supportive
4/27/2022 19:43:30	Rheumatologist	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	The familiarisation of doctors with electronic data and patient health records should be increased.
4/27/2022 19:45:46	UROLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT IS IMPORTANT
4/27/2022 20:25:15	THORACIC SURGEON	55-65	MALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	In electronic format
4/27/2022 20:32:05	GASTROENTEROLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	The future role of doctors will be decisive in this field. Their training should take place during attendance at medical schools.
4/27/2022 20:41:44	PAEDIATRICIAN	45-55	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	very important role, because they need to protect the health data of their patients and guide them in their management
4/27/2022 20:57:10	SURGEON	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Priority
4/27/2022 21:04:19	RADIOLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	.
4/27/2022 23:02:44	OTORINOLARYNGOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	WITH PRESERVATIVES
4/27/2022 23:02:55	Pediatric psychiatrist	55-65	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Information — Awareness...
4/27/2022 23:07:05	Rheumatologist	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I don't think patients should manage their health data.
4/27/2022 23:10:00	CARDIOLOGIST	65-75	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	PATIENTS MANAGE THEIR HEALTH MANY TIMES WITHOUT ASKING US ANOTHER BUREAUCRATIC BROTH, LIKE THE POPULARISATION OF HEALTH, AND DOCTORS WILL BE BURDENED WITH ENOUGH HOURS OF UNUSED WORK. THERE WAS THE EXPERIENCE OF ELECTRONIC SYNTAX.
4/27/2022 23:10:18	WITHOUT SPECIALTY	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	
4/27/2022 23:23:25	GYNAECOLOGIST - OBSTETRICIAN	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	It is wrong for patients to deal with protocols, diagnostic and therapeutic actions.
4/27/2022 23:40:04	PAEDIATRICIAN	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Doctors should be familiar with technology and serve their patients and in this field.
4/27/2022 23:56:19	PNEUMONOLOGIST	35-45	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	IT'S HARD
4/28/2022 6:04:47	BIOPATHOLOGIST	45-55	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	It would be very useful for the doctor and a benefit to the patient.
4/28/2022 8:32:31	PSYCHIATRIST	55-65	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	I wouldn't like to take care of it.
4/28/2022 8:36:22	GENERAL/FAMILY MEDICAL DOCTOR	35-45	FEMALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	DO NOT THINK OF THE DOCTOR TO GUIDE THE PATIENT IN THE MANAGEMENT OF HIS HEALTH DATA; THE PATIENT MUST HAVE ACCESS TO HIS/HER PERSONAL HISTORY BUT MUST BE INFORMED BY SOMEONE ELSE.
4/28/2022 8:55:19	GENERAL/FAMILY MEDICAL DOCTOR	45-55	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	That's right.

4/28/2022 8:56:20	RADIOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Crucial
4/28/2022 9:39:22	DERMATOLOGIST-APHRODISIOLOGIST	45-55	MALE	YES	NO	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	I don't know
4/28/2022 10:16:14	PATHOLOGIST	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	That's very important.
4/28/2022 10:40:01	HAEMATOLOGIST	55-65	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	A great storage of staff, there are no executives to pass the electronic record. It is urgent to have such staff as to make it possible for any doctor who is called upon to provide services to a patient to be informed from the medical file, wherever he or she is. You will avoid
4/28/2022 10:56:50	OPHTHALMOLOGIST	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	The management of health data is a multifaceted and complex issue. It is difficult to visualise the future role of doctors in this field.
4/28/2022 10:59:57	OPHTHALMOLOGIST	55-65	MALE	NO	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	TRAINING OF DOCTORS IN DIGITAL MEDIA
4/28/2022 12:15:09	WITHOUT SPECIALTY	25-35	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	The existence of an electronic patient file and full information on how to gain access to these data.
4/28/2022 12:25:51	NEUROLOGIST	35-45	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Advising support
4/28/2022 12:40:50	PATHOLOGIST	45-55	FEMALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	High. Doctors are technology-savvy	THAT'S NOT THE DOCTOR'S JOB. The Doctor should not waste a minute of his time instructing patients to manage this data electronically. Create a HelpDesk phone. The doctor examines and gives treatment, it's not informative. Goodness, the doctors do it all, why patients will have to manage their data through an authorised person who will be the parent/guardian. I need information on the exact meaning of managing health data for all and more children.
4/28/2022 12:46:27	PAEDIATRICIAN	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	
4/28/2022 14:04:42	CARDIOLOGIST	55-65	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	May all doctors be able to guide their patients in managing their health data
4/28/2022 14:34:43	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	THAT'S RIGHT.
4/28/2022 15:43:41	OPHTHALMOLOGIST	45-55	FEMALE	YES	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	
4/28/2022 16:13:43	WITHOUT SPECIALTY	25-35	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	I think it is vital that all patients and health professionals have access to health data as this way the patients will receive targeted help and treatment, and the work of doctors will become much more direct and easier.
4/28/2022 18:17:57	NEPHROLOGIST	45-55	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Subject to the creation of the electronic file, I believe that the doctor should be able to direct the patient to access his health data.
4/28/2022 18:18:40	PATHOLOGIST	35-45	FEMALE	NO	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Keeping an electronic file and guidance provision to the patient
4/28/2022 19:24:35	GYNAECOLOGIST - OBSTETRICIAN	55-65	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Imperative
4/28/2022 20:25:24	PLASTIC SURGEON	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Essential to Improvement of Doctors and Patients
4/28/2022 20:51:49	UROLOGIST	65-75	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It is advisable to have an electronic health record of each patient who will be informed by each doctor when the patient asks for his/her help for a health problem
4/28/2022 21:04:04	PAEDIATRICIAN	45-55	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Just a consultative and helpful role.
4/28/2022 21:48:21	OPHTHALMOLOGIST	35-45	MALE	YES	YES	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	It's hard
4/28/2022 22:41:53	ORTHOPAEDIC	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Improving digital capacities and cutting red tape

4/28/2022 23:45:43	PATHOLOGIST	35-45	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	As a partner of every patient.
4/28/2022 23:58:20	PATHOLOGIST	35-45	MALE	YES	NO	Yes, but I can only see patient health data	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Important for better management of their health and cooperation issues with the doctor
4/29/2022 2:18:45	Pediatric psychiatrist	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Guidance and assistive
4/29/2022 8:39:27	PATHOLOGIST	35-45	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	positive Changes Take Time
4/29/2022 9:04:35	PNEUMONOLOGIST	55-65	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It is important
4/29/2022 9:32:40	ENDOCRINOLOGIST	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I am not concerned at the moment. However, I believe that medicine should remain with personal contact and not be guided in remote treatment. Too many errors are already being made, as it has been shown in the COVID period where we had to serve remotely.
4/29/2022 9:51:56	Oncologist	35-45	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	The pathologist oncologist (which is my specialty) must guide the patient with realism and objectivity.
4/29/2022 12:27:03	OTHER SPECIALTY	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	Telemedicine
4/29/2022 12:56:05	RADIOLOGIST	45-55	FEMALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	The main issue that needs to be resolved is the security of personal data.
4/29/2022 13:11:43	CARDIOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Ask patients at each visit to open the health file and sit down.
4/29/2022 13:39:23	SURGEON	65-75	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	INFORMATION AND PROPER GUIDANCE
4/29/2022 13:42:56	WITHOUT SPECIALTY	25-35	OTHER	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	the Consultative Information
4/29/2022 15:26:50	CARDIOLOGIST	45-55	FEMALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	it is important
4/29/2022 17:54:53	GENERAL/FAMILY MEDICAL DOCTOR	65-75	MALE	YES	NO	No, I have no access to electronic health records	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	It is necessary
4/29/2022 18:36:13	SURGEON	45-55	MALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	It's not the doctor's job, but it could have been someone else's.
4/29/2022 19:06:59	ORTHOPAEDIC	45-55	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	High. Doctors are technology-savvy	Difficult
4/29/2022 21:05:31	ANESTHESIOLOGIST	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	
4/29/2022 22:33:56	PNEUMONOLOGIST	45-55	MALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	It's a good idea.
4/30/2022 0:16:03	ANESTHESIOLOGIST	45-55	FEMALE	NO	YES	Yes, but I can only see patient health data	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I WISH THERE COULD BE A SINGLE ELECTRONIC FILE OF PATIENTS SO THAT THERE IS A TIMELY AND VALID UPDATE TO THE HEALER DOCTOR.
4/30/2022 0:53:33	OPHTHALMOLOGIST	35-45	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	I don't know
4/30/2022 0:57:31	RADIOLOGIST	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	THERE IS A NEED FOR A PROVISION OF ASSISTANCE
4/30/2022 9:11:51	PATHOLOGIST ANOTO	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	IT WOULD BE IDEAL.

4/30/2022 9:19:27	PATHOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	very basic
4/30/2022 11:09:47	NEUROLOGIST	45-55	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	Essential
4/30/2022 11:33:41	Pediatric psychiatrist	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT'S A GOOD IDEA.
4/30/2022 12:35:46	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	THEY MUST FIRST TRAIN THEMSELVES WITH A SEMINAR, EVEN ONLINE, TO HELP THEIR PATIENTS AS WELL.
4/30/2022 13:07:33	HAEMATOLOGIST	35-45	FEMALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	IN GENERAL, PATIENTS ARE COMPLETELY IGNORANT OF THEIR CONDITION, LET ALONE TO HANDLE THEIR DATA. IN HEALTH CLAIMS THERE IS A PATHOLOGICAL RELATIONSHIP BETWEEN PARENTS AND INFANTS INSTEAD OF A MEDICAL
4/30/2022 16:25:23	CARDIOLOGIST	65-75	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	High. Doctors are technology-savvy	IT IS NECESSARY
4/30/2022 17:25:44	PAEDIATRICIAN	55-65	MALE	YES	NO	Yes, but I can only see patient health data	Yes, but they can only see their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	It would be ideal.
4/30/2022 22:51:42	UROLOGIST	55-65	MALE	NO	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	I can't imagine him.
5/1/2022 19:44:22	ORTHOPAEDIC	45-55	MALE	YES	YES	No, I have no access to electronic health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	I THINK THE PRIORITY OF DOCTORS IS TO DIRECT PATIENTS TO ISSUES RELATED TO THEIR OWN SPECIALTY.
5/1/2022 20:09:10	CARDIOLOGIST	45-55	FEMALE	YES	YES	Yes, but I can only see patient health data	Yes, but they can only see their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IMPORTANT
5/2/2022 1:14:26	PNEUMONOLOGIST	55-65	FEMALE	NO	YES	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT'S HARD BECAUSE PATIENTS AREN'T USED TO IT.
5/2/2022 1:54:24	PATHOLOGIST	55-65	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Low. Doctors need to develop their digital skills	I don't agree.
5/2/2022 10:36:21	PAEDIATRICIAN	35-45	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	For guidance to be successful, I would need secretarial support.
5/2/2022 12:15:01	PNEUMONOLOGIST	55-65	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	The question is what we mean by managing health data on behalf of patients. At a time when patients have access to the internet and the non-specialised information it offers, all this needs a lot of attention. I am a follower of the classical Hippocratic view of clinical examination and communication with the patient, and in the Hippocratic conception of patient-doctor relations, but the doctor is the scientist who labors in adverse conditions, in
5/2/2022 12:20:45	NEUROSURGEON	35-45	MALE	NO	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	High. Doctors are technology-savvy	They could have a role if they had the time that most people don't have. Perhaps patients should already be aware of the existence of such data, their access to it and their management by independent bodies.
5/2/2022 13:56:41	ANESTHESIOLOGIST	55-65	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Medium. Doctors need to improve their digital skills	Very important
5/2/2022 17:52:55	PATHOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. Patients have no access to health data for patients	Low. Doctors need to develop their digital skills	It's impossible.
5/2/2022 19:05:50	OPHTHALMOLOGIST	55-65	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	IT'S A GOOD IDEA.
5/2/2022 20:59:19	PATHOLOGIST	45-55	MALE	YES	YES	Yes, I can see and write in patient health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	The management of medical data by non-authorized physicians is illegal and dangerous
5/3/2022 10:14:39	PATHOLOGIST	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, they can see their records and can transfer their data to other healthcare providers	I often assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	Important
5/3/2022 10:30:48	PNEUMONOLOGIST	55-65	FEMALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	A clear electronic management of sensitive personal data such as health data is required with absolute protection. Informing doctors' training in the legal framework of electronic data management protection so that they can guide their patients
5/3/2022 11:36:39	CARDIOLOGIST	55-65	MALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	Never. This is not part of my functions as a doctor	Medium. Doctors need to improve their digital skills	IT'S A GOOD IDEA.
5/3/2022 19:16:01	OPHTHALMOLOGIST	45-55	MALE	NO	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I often assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	it is important

5/4/2022 0:04:36	PATHOLOGIST	45-55	FEMALE	YES	NO	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	I don't know
5/4/2022 7:12:24	OPHTHALMOLOGIST	35-45	FEMALE	YES	YES	No, I have no access to electronic health records	No, they do not have access to their health records	I seldom assist patients in informing how to access their health data	Low. Doctors need to develop their digital skills	More active and frequent than today
5/4/2022 12:45:53	CARDIOLOGIST	55-65	MALE	YES	NO	Yes, I can see and write in patient health records	Yes, but they can only see their health records	I seldom assist patients in informing how to access their health data	Medium. Doctors need to improve their digital skills	Update, data analysis, assistance
